Purchase Order Management

Start Your Supply Chain Strong

Your supply chain starts with your purchase orders – and now your supply chain visibility can, too. Go beyond track and trace with AGL PO Management to gain next-level control from the moment orders are created. Powered by our purpose-built platform and hands-on service, AGL PO Management sets the pace for supply chain optimization. Create orders, manage vendors securely, move goods seamlessly and get powerful analytics to run a more efficient, cost-effective supply chain.

All Together Now

Transportation, Done Your Way

Once your goods are ready to ship, we'll work with your carriers directly – no matter who they are. As a carrier- and mode-neutral partner, AGL minimizes implementation hassles while moving your freight as quickly and cost-efficiently as possible.

AGL PO Management is powered by the AGL Cloud to give you access to our deep, multimodal logistics network.

Data- Driven Decisions

A customized dashboard offers insights on the metrics that matter to you, from production status to carrier and vendor performance. Armed with up-to-the-minute information, you can uncover new ways to trim costs, improve efficiency and run a more nimble supply chain.

Spend Your Time Wisely

Still reviewing every purchase order for accuracy? Then you're about to have a lot more time on your hands. With your business rules and requirements at the forefront, our platform features intelligent alerts and escalations that let you focus only on the orders that need attention.

Every order. Every supplier. All in one place. Whether you work with one vendor or dozens, AGL PO Management makes managing them simpler and more secure. User-based permission levels eliminate worries about sensitive information getting into the wrong hands (or the wrong hands impacting your shipments). And with the AGL Cloud powering all of our services, teams around the globe can stay up to date, at any time and from any place.
